

Notes:

- Some legend symbols are enlarged for easier identification.
- Aerial photography is from ESRI World Imagery, 2023-2025.
- Sensitive cultural resource data are not shown on this map as these data are not to be reproduced, distributed, or released to the public.
- Data are for display purposes only. All features and boundaries have been approximated based on information gathered from review of public resources and from field reconnaissance.
- Property lines shown have been obtained by current county tax rolls, deeds research, and field survey.
- Due to potential horizontal inaccuracies of the aerial photography and data utilized, all habitable structures within 500 feet have been identified.
- Due to the length of the Project and scale limitations, the 95-foot separation between the A-link build-adjacent centerline and the B-link centerline is not visible along the entirety of the Project on Figures 3-1A through 3-1-L. See the Typical Offset Detail inset panel on each figure for the offset between the proposed centerlines.
